**Q24.** There is currently a bipartisan bill (a bill with both Republican and Democratic sponsors and cosponsors) that has been introduced in the Senate and the House called The Breakthrough Therapies Act. This legislation will remove regulatory hurdles that inhibit research and compassionate use access to two substances currently classified as Schedule I drugs and move them to Schedule II—MDMA and psilocybin— which have shown exceptional promise in treating an array of mental health conditions, including treatment-resistant suicidal depression, anxiety, PTSD, and substance use disorders. Do you support or oppose this legislation?

**Q25.** There is currently a bipartisan bill (a bill with both Republican and Democratic sponsors and cosponsors) that has been introduced in the Senate and the House called The VA Medicinal Cannabis Research Act of 2023. This bill requires the Department of Veterans Affairs (VA) to study the effects of cannabis on veterans who are enrolled in the VA health care system and have been diagnosed with post-traumatic stress disorder (PTSD) or chronic pain (i.e., eligible veterans). The Congressional Budget Office has estimated that the bill will cost less than $500,000 in total over the course of a five-year period (2023-2028). Do you support or oppose this legislation?
